TECHNICAL SKILLS

Engine & language

Unity 6, C#

Gameplay & AI

Utility AI, NavMesh, raycasting, interaction systems

Narrative systems

Ink, branching dialogue, game state

Unity tools

Render Texture, ScriptableObject, AnimationCurve, Unity Profiler

Workflow

Git, GitHub, Visual Studio

EDUCATION

THUY LOI UNIVERSITY

B.Sc. Information Technology

2021–2026 | GPA 3.18/4.00

Good graduation classification

Scholarship recipient (2022)

PROFILE

Recent Information Technology graduate focused on Unity gameplay programming. Developed a playable 3D psychological horror game combining utility-based monster AI, CCTV surveillance, NPC navigation, and branching narratives.

FEATURED GAME PROJECT

YOU HEAR THAT? | 3D Psychological Horror Game

Graduation project (2026) • Unity 6, C#, Ink, URP, NavMesh

Portfolio: github.com/lnduongg/You-Hear-That

Gameplay demo: youtube.com/watch?v=E_q-wjqsOGI

- Created a playable first-person horror experience featuring radio-driven decisions, hidden Trust / Time Pressure variables, and multiple endings.
- Developed utility-based monster AI using ScriptableObject considerations, AnimationCurve scores, and camera visibility checks.
- Built a 12-viewpoint CCTV surveillance system with a single rendering camera and Render Texture to limit unnecessary rendering work.
- Integrated Ink story tags with C# gameplay events, GameStateManager, and NavMeshAgent waypoint navigation.
- Implemented player interactions, object outlines, and in-world UI prompts to support immersive gameplay.
- Measured performance with Unity Profiler; reported 60–75 FPS during normal gameplay on an RTX 3050 laptop.

PROFESSIONAL EXPERIENCE

BACKEND DEVELOPER INTERN | Hi1

Feb–May 2025

- Built backend services for an AI-powered product recommendation application using Python and FastAPI.
- Structured product data and integrated database-backed information into AI recommendation workflows.

ADDITIONAL PROJECTS

GIS Weather Map — JavaScript, PHP, PostgreSQL/PostGIS; geospatial queries and OpenWeatherMap layers.

Chatbot AI — Python, FastAPI, PostgreSQL, SQLAlchemy; product chatbot with database-backed responses.
